

FINDOS Symposium 2023:

Big data in orthodontics and periodontology

Wednesday 24th May

Call for digital posters

This year FINDOS Symposium digital poster session will be organized as "Read by title" presentations. All National FINDOS doctoral researchers and other researchers and research groups are invited to send their digital posters in PowerPoint presentation form that could be presented as "a read by title" presentation.

The presentations will be viewable as a continuous power point presentation on the spot on screen during the breaks. The presentations are running automatically on the screens but it is highly recommended that the researcher/presenter could be at the place at 10.00-10.45 in Arje Scheinin lecture hall for questions and discussions with others.

Instructions

- 1) The presentation should not include more than 3 slides.
- 2) The opening slide should display a straightforward title, name of the researcher and collaborators, affiliations with preferably an illustrative image. The objective, materials, and methods, results and conclusions should not exceed more than 250 words, and they should be presented in maximum of 2 slides.
- 3) Clinical patient cases can also be presented.

Submission of Posters (ppt) by **19 May 2023** ~~15 May 2023~~ to coordinator Sanni Helander sanni.helander@utu.fi.

We strongly encourage all study groups and researchers to present their studies in FINDOS Symposium!

If you want more information about the presentations, please contact Janna Waltimo-Siren (janna.waltimo-siren@utu.fi).
