

Introduction

Dear reader, You are getting acquainted with the 2021-2025 strategy of Rauma Teacher Training School which is a part of Turku University. The following tasks are the starting point of our strategy: the implementation of basic education, supervised practice, research, experimentation and development activities, and continuing education designed for future needs. The strategy represents what an evolving, prosperous, and high-quality teaching and training school should be like and promotes an environment where the interaction of the whole community is open and inclusive. The strategy is our vision of the direction in which we are moving together.

The teacher training school system as an integral part of teacher education is both unique and internationally acclaimed. Our challenge for the future is to be aware of the kind of knowledge and skills that need to be taught and emphasized in primary education as well as the kind of teachers we should train. A wide range of skills and in particular, diverse interaction skills are required for both children and adults.

Internationality, educational export, regional influence, extensive networking, and a close connection to research are emphasized in a university teacher training school. Digitalization and the goal of lifelong learning are an unavoidable development of ours.

There are basic pillars of teaching and education that are evident in our strategy: transparency, uniqueness, equality, and communality and security. The goals include knowledge and skills that help new generations to build a sustainable future

Our long history, with over 122 years of teaching, gives us valuable perspective about changes and challenges that impact school life. We are recognized for active development, keeping up with the times, and keeping up with the corresponding requirements. When it comes to change, we still are and have always been a flexible and dynamic school that continuously develops its operational culture. Welcome to join a builder of quality education and well-being!

**Get inspired
by the future.**
