

A competent and prosperous community

Rauma Teacher Training School is an encouraging and inclusive school where the well-being of pupils and staff is important. In our operating culture, we ensure equality and non-discrimination. Open interaction between all members of the community creates the foundation for a successful school day. We support pupil friendships because they enable well-being and the joy of learning to increase.

Every member of the school community is equally important

As an UNESCO and Green Flag school, we cherish cultural values and closeness to nature, because we operate in an environment that is of culturohistorical significance and the Rauma campus garden is nationally unique.

The versatility of learning environments allows you to find individual interests and learn to work with others. The experience of belonging to a community arises from caring encounters in different environments and by acting with respect for others.

Knowing the goals of learning is the starting point for both choosing learning environments and methods and taking into account the individual needs of pupils.

Modern technology is part of the daily life of the school and the digital operating environment is up to date. We also operate in accordance with the principles of sustainable development.

Diverse encounters and learning situations reinforce well-being

We value working with pupils and guardians so that everyone gets the support they need during their school career. We encourage everyone to develop their skills and share them with others, because the well-being of the whole school community is built from the unique individuals therewithin.

Get inspired by your community.
